

T&O Training Post Summary

Trust

North Cumbria University Hospitals Foundation Trust

Trainer name(s)

Mr R. Dharmarajan

Job Summary

Lower limb arthroplasty and soft tissue knee.
High proportion of work is with revision knee arthroplasty and with bone infection. As a result, work with the bone infection group and complex knee and arthroplasty clinics are possible. Concurrent operations include, primary knee and hip arthroplasty, Arthroscopic ACL reconstruction, high tibial osteotomies, Tibial tuberosity osteotomies and meniscal work. This gives a varied workload on lists.

Cross site work with both theatre and clinics.

Part of the Registrar on-call rota with non-resident on-call. Good exposure to trauma in both clinics and in theatre.

Good level of support within clinics and theatre allow development and progression with sufficient allocation of time for projects and educational work.
