

T&O Training Post Summary

Trust

North Cumbria NHS Hospitals Trust

Trainer name(s)

William Hage

Job Summary

Consultant Orthopaedic Surgeon with an interest in knee surgery

Full on call for orthopaedic trauma

Elective practice solely on knee surgery

Mr Hage is a knee surgeon, appointed in 2012 to The Cumbrian Hospitals. This post has an elective component that focuses on knee surgery. Mr Hage performs all aspects of soft-tissue knee surgery from teenagers upwards and uses arthroscopic techniques for ACL, multiligament and revision ACL reconstructions. The trainee will have an opportunity to see and learn the full range of arthroscopic procedures under supervision. A senior trainee with existing arthroscopic skills will be encouraged to take on more of the operations as lead surgeon under supervision.

The Joint replacement portion encompasses all forms of primary knee replacement, TKR, PFJ, and UNI. Mr Hage does not perform any revision knee replacement. In addition Mr Hage performs osteotomy around the knee in conjunction with Matt Dawson's local expertise in the field.

The trauma commitment is according to the hospital's on call rota, and again Mr Hage will support his trainees in increasing their trauma skills in theatre with adequate supervision.

Mr Hage has a growing research interest with involvement in TOPKAT, The National Ligament Registry and local research projects.
