

T&O Training Post Summary

Trust

Newcastle Hospitals NHS Foundation Trust

Trainer name(s)

Malik Siddique

Job Summary

This post offers training from a senior consultant with interests in elective, complex foot and ankle surgery. The opportunities in this post can be tailored to the needs of the trainee, but include:

Exposure to all aspects of Foot and Ankle surgery including fortnightly Multidisciplinary academic meetings in which complex cases are examined and discussed. The trainee will have exposure to a specialised range of complex surgeries including osteotomies, arthrodeses, reconstructive foot surgery, ankle arthroscopy and Ankle joint replacements.

Mr Siddique is current Chairman of the Ankle User Group. His main area of interest is in the training of juniors and seniors in reconstructive ankle deformity correction. His research is based on his 15 year experience of ankle replacement surgery. The hospital has a complete data base of 270 ankle replacements which provide trainees with the opportunity to present and publish research and long term ankle outcome results to national and international level
