

## TRUST

The Newcastle upon Tyne Hospitals NHS Foundation Trust – RVI Trauma & Metastatic Oncology

### Trainer Names

Mr Fearon

Mr Beckingsale

### Job Summary

This busy post offers training in all aspects of trauma received in a MTC, including pelvis and acetabulum surgery. The job also includes specialist referral for bone tumours, both primary and metastatic, presenting via the trauma service. Trainees will gain experience of investigating, diagnosing and treating unknown pathologic lesions.

As the orthopaedic trauma service at the RVI is consultant delivered, this post is suitable for all levels of trainee as the training opportunities are tailored to the needs of the individual trainee.

Daily business trauma meetings are supplemented by a weekly educational MDT Trauma meeting, with monthly journal club and a monthly hospital major trauma MDT review.

In addition to concentrated clinical trauma exposure, trauma research opportunities are available to those interested trainees. There is an active Consultant led trauma education programme.

These posts offer access to cadaveric simulation training courses at the Newcastle Surgical Training Centre ([nstcsurg.org](http://nstcsurg.org))
