

T&O Training Post Summary

Trust

Northumbria Healthcare NHS Trust

Trainer name(s)

Dominic S Inman MBChB FRCS(Tr&Orth)

Job Summary

This post offers the trainee excellent exposure to primary hip and knee arthroplasty, knee arthroscopy and both acute and sub-acute complex trauma.

The trainee can expect to become proficient to level 3 in primary arthroplasty and knee arthroscopy and also get good exposure to the management of complex lower limb fractures including tibial plateau fractures, peri-prosthetic fractures and non-/ mal-unions.

Acute trauma operating is based on trauma weeks (1 in 10) with, in addition, a regular tertiary referral trauma list on Friday afternoons.

There are bi-monthly trustwide journal club meetings and audit meetings to which the trainee will be expected to contribute.

Mr Inman is an AO and ATLS instructor, is trauma lead for North Tyneside and also teaches annually on a national hip and knee arthroplasty course. He is also chairman of the trust's award winning Hip fracture improvement programme (HIPQIP).

Trainees are expected to work hard and throw themselves into the job 110% and in return should have an excellent 6 months experience.
