

T&O Training Post Summary

Trust

Northumbria Healthcare NHS Trust

Trainer name(s)

Govinda Prasad

Job Summary

This is a training post for those requiring experience mainly in Primary Hip and Knee Arthroplasty.
Post is ideal for post exam trainees who wish to take up lower limb arthroplasty as their sub speciality. However the training can be adapted to a junior trainee. Trainees will get hands on experience to a number of primary Hip and Knee replacement procedures (depending upon the experience and ability of the trainee), under the direct supervision of the trainer.
Trainee will also get good experience in management of limb trauma under the supervision of your trainer and other trainers in the department.
Trainee will get supervised hands on experience in arthroscopic knee surgery excluding ACL reconstruction.
We have a trauma meeting every morning to discuss previous days' admissions and to discuss post operative x rays.
We also have monthly Journal club meetings and Audit meetings.
There is ample opportunity and encouragement to carry out Audit /Research/teaching/presentations.
Apart from my routine lists Trainees are welcome to attend my waiting lists when they can.
