Personal Notes : My higher surgical training in Trauma and Orthopaedics was in the North East of England. I have been a consultant since December 1999. My qualifications are MBBS, FRCS, FRCS (Tr & Orth)

My current practice is principally Primary hip and knee Arthroplasty surgery. (On an average 200 arthroplasty a year) I also carryout arthroscopic surgery of the knee. I do not take part in trauma rota anymore and I have no on- call commitments.

Trainees are likely to be get experience in primary arthroplasty and simple arthroscopic knee surgery depending on their surgical skills and enthusiasm.

Organisations Wider Responsibilities

Published Work

Essense Of Practice

Expectations Of Trainees I'm looking for

Trainees who are keen to learn and take responsibility.

I am irritated by trainees who are lazy and dishonest.
